

Come Here - Gives Reinforcer

Parent "Come Here."

Child (walks to her mother within 4 seconds)

Parent "Thanks for coming over." (gives child a hug)

Antecedent (The instruction)	Behavior	Consequence	Behavior will increase or decrease in the future
Parent ask child to go to her	Child goes to her parent	Parent gives a reinforcer immediately after going over	The reinforcer (praise and hug) will increase the likelihood the child will go to his parent after being told to in the future

After the child performed the task, a positive consequence was given (praise and hug). The child will continue to listen to her parent in the future.
